

**About the seminar:** It is a well-known fact that the social problems are often interconnected and complex, requiring insights from multiple disciplines to understand and to address. Multi-disciplinary approaches provide a holistic understanding of social issues, considering the social, economic, environmental, and cultural contexts. These approaches also lead to innovation and creativity to merge diverse perspectives and to arrive at innovative solutions. In turn, multi-disciplinary collaboration facilitates knowledge sharing, allowing experts to learn from each other and develop new ideas. It enables to address the root causes of social problems and to look out for more comprehensive solutions in this technology-driven society in which the human relations and sentiments are getting disturbed. Interdisciplinary teams engage with diverse stakeholders, ensuring that solutions are community-driven and responsive to local needs. Against this backdrop A Two-Day Multi-Disciplinary National Seminar has been conceived on “Recent Disciplinary Trends Towards Social Transformation” during 21st & 22nd March 2025 by the Department of English, Sri Padmavati Mahila Visvavidyalayam(Women’s University) Tirupati.

### Editors
